

# Kelly-Creswell Pressure Bead Gun KC-593B Diaphragm Operated Bead Gun

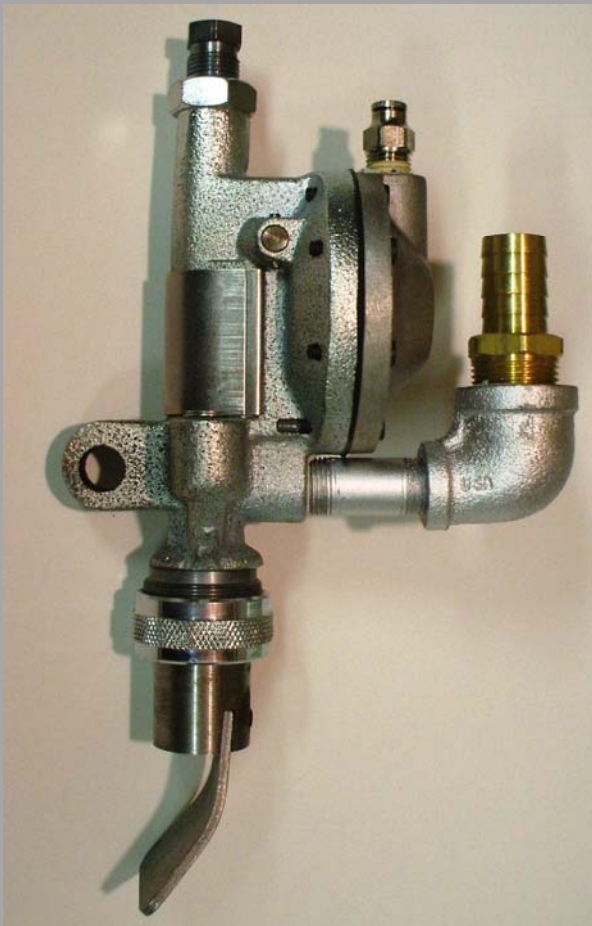

593B series bead guns are automatic diaphragm operated and designed to meet the rigorous requirements of municipal and industrial striping.

KC-593B is designed for portable striper machines to apply reflective beads at speeds up to 4 MPH.

Multiple nozzle sizes available to insure accurate application rates.

Bead deflector fin directs reflective beads into paint line.

Kelly-Creswell guns are a proven performer with over 50,000 units sold!

- Optional adjustable deflector.
- Optional atomization line to aid in distribution of beads.
- Easy to service and maintain.
- Parts, service available from Kelly-Creswell a name that has defined striping since 1937.
