

Kelly-Creswell Truck Refurbish

Conversion To Airless Spray System For Latex Paints

- Prior to refurbish this was a 15 year old striper, air atomized pumper unit with carbon steel tanks and air spray paint delivery system.
- Removed air spray components including tanks, spray guns.
- Installed air powered high pressure airless paint pumps utilizing existing compressor as power for the pumps.
- Installed a zero pressure stainless steel paint vats, 250 gallons yellow, 250 gallons white and a 20 gallon stainless steel pressure cleaner tank.
- Installed new stainless steel plumbing, stainless steel paint filters, KC-700 high pressure airless paint guns and KC-600 bead guns.
- Installed KC Mark 40D skipline control system and guidance system.
- Installed new center mounted gun carriages with hydraulic steering.
- The unit is 100% waterborne compatible with latest high pressure airless paint system offering sharp edge lines with minimal overspray.

- Contact us with basic information on your striper including digital photos and we can then recommend a refurbish program that best suits your equipment and striping needs.
