

Kelly-Creswell Nightliner Series Bead Gun

Kelly-Creswell Nightliner Bead Gun is a proven performer with perfect cross distribution of reflective beads for excellent line reflectivity.

Works with standard and large sphere beads.

Nightliner features a flexible rubber shroud that positions close to the pavement and stops bead loss due to wind and overspray.

Heavy-Duty rubber shroud 4", 5", 6" & 8" kits available.

Large 1-1/4" diameter inlet with storage accumulation chamber and air muffler reduce pulsations caused by air pockets in bead system.

Simple adjustable volume stop for accurate bead calibration.

Three position mounting bracket insures compatibility with your truck mounted gun carriage or portable striping machine.

Manufactured by Kelly-Creswell a name that has defined striping equipment since 1937.

- All moving parts are covered and protected from overspray
- Operates on pressure and gravity bead systems.

- Order:
